About This Content

A small island lost in the sea is covered by snow and ice. It is inhabited by the clan of Snow Elves. Young Olaf, the son of the Northling King, faces his destiny again as he helps the people of the North in their struggle against the upcoming thaw.

New adventures and challenges, new friends and foes, new items and awards await Olaf on his way to victory. He will set off on a journey to distant parts of Endoria that weren't visited even by the Royal Bounty Hunters...

- Creature skill system – lead your troops through dozens of battles and they will become stronger than ever!
- Snow Elves – a new Elven nation that prefers snow and blizzard of the Ice Gardens instead of the green forests of Merlassar.
- Necrolizards – a new kind of the undead, Lizardmen that have risen from the dead.
- New locations to explore.
- Over 20 new creatures.
- Revamped creatures of King's Bounty: Warriors of the North.

-
- New items with unique attributes.
 - Over 20 hours of additional gameplay.

Played on Mac OS X Yosemite. Terrible experience. Mainly because there is no ability to change the resolution. Looks even worse than Armored Princess. Don't recommend this game, at least until graphical glitches are fixed.. Collected all editions of King's Bounty, but only finished two of them. Got so much fun from them.. Having played all the previous and latest additions of this lovely franchise, i can only say that if or when they patch things up correctly the games really are so much more fun to play and one can keep playing because they add a lot of replayability.

The artwork is really nice imo, and the soundtrack matches perfectly. However i have experienced plenty of bugs, and some of them cause the game to crash now. Experiencing that can be quite a pain in the butt, if you didn't save up your progress earlier, so save up plenty! I do hope one day these great games are all patched up nicely so i will gladly give those who suffer(ed) from them the most, a higher score accordingly.

As for this one i will give it 7.5/10 just because i personally have experienced crashes a bit too often (-1p)

Otherwise i would have rated it a high 8.5/10.

For those who can't get enough, be sure to pick up the previous and later ones as well, because they're really worth it!. If you want to play KB:Warriors of the North - you have to buy this DLC!!!

It's adds dozens of new quests, battles and stuff!

Must buy!. This is what original Kings Bounty Warriors of the north had to be.

Polish version with new quest, skills, magic, units.... What can i tell from screenshots on this store page is that someone just cheated him self a lot of leadership...

10/10. I am currently playing this game and I enjoy the game except for when it locks up.

This is the version that must be published in the first place. It is a great game if you a fun og Turn based strategy -rpg. I love the musics, story and fun dialog of the game. I love it's graphic, too.
